

If you get an error message about certain files or their dependencies being missing, do this to load the files:

1. Close the CD down but don't remove it from the drive.
2. At the bottom left of your computer screen click on the Start button and click on "computer" in the list on the right.
3. **Right** click on the CD drive and click "explore" or "open". This will show a list of all the folders and files on the CD.
4. Find the folder named "**VB 6 files to register**" and double click on it to open up the list of files that you need.
5. Find the icon named "**copy_vb_files**" and right click on it, and then click on "Run as administrator". If you get a window that asks you if you want to continue, click "continue". This should register all of those files on your computer. You should see a black screen with lots of white gibberish flying by while they load.
6. You may have to restart your computer after registering the files.
7. If it still doesn't work, try the instructions below.

If it still doesn't work, download the trial version of the software used to create the CD in order to register the files on your computer. To do this:

1. Download the trial version of the Exam software by going to this site:
<http://www.exam-software.com/download.htm>
2. You will see the following table.

Product/Operating System	File Type	File Size	File Name
Exam (Windows) Operating System: Windows 95/98/2000/2003 ME/XP/Vista/NT 4.0 (or later)	.exe File	3085 kb	exam.exe => Download
	.zip File	3077 kb	exam.zip => Download
	Chopped Files	1032 kb	exam-disk.exe => Download-1
		1027 kb	exam-disk.D01 => Download-2
1027 kb		exam-disk.D02 => Download-3	

3. Download the .exe self-extracting installation file marked in yellow above. To install the software just run the executable file as "Administrator" and follow the instructions on the screen.
4. This should register all the files that you need to run the CD. Once the files are on your computer the CD should work when you put it in your drive.
5. If it still isn't working, email me at geskrit@aol.com and name your email "CD Problem" or something so I won't think its spam. I will try to help you through email or on the phone.
