CNEA IS A PROVIDER APPROVED BY THE CALIFORNIA BOARD OF REGISTERED NURSING
 PROVIDER NUMBER 15714
 Cardiovascular Nursing Education Associates

CNEA Presents:

Seattle Cardiac Boot Camp #2

September 9, 2019: **12 Lead ECG**

Interpretation: Essential Skills for Clinical Practice - presented by Carol Jacobson

September 10, 2019: **Cardiac Diagnostics and Cardiac Treatment Update**—presented by Cindy Webner

September 11, 2019: **Emergency and Critical Issues in Cardiac Care**—presented by Karen Marzlin

Sign-in and light breakfast at 7:30 am

All Classes: 8:00 am—4:30 pm

Location:
Renton Technical College
3000 NE 4th St.
Renton, WA 98058

3 Day Cardiac Boot Camp

About CNEA

Carol, Karen and Cindy together have well over 100 years of clinical practice in the cardiovascular arena. They have presented thousands of professional programs locally and nationally, including annually at the AACN National Teaching Institute (NTI). Committed to helping you achieve your professional education and certification goals Carol, Cindy and Karen teach and write in a style that promotes understanding rather than memorization. They believe that understanding is the key to critical thinking and clinical decision making. With a passion for clinical practice they understand the difference your nursing care makes in the lives of patients and their families. They will share knowledge and skills that will equip you to take your practice to the next level and impact the outcomes of the patients you care for. Committed to lifelong learning, these educators are skilled in communicating complex concepts in a clear and meaningful way. Their presentations combine humor, energy, and creative teaching strategies to make CNEA courses a memorable learning experience. Your professional spirit will be renewed as you learn and you will be prepared to translate your new knowledge into practice

Day 1:

12 Lead ECG Interpretation: Essential Skills for Clinical Practice

- Anatomy of a 12 Lead ECG
- Normal & Abnormal Waveforms
- Easy QRS Axis
- Bundle Branch Blocks
- Coronary Circulation
- ECG Changes of Ischemia, Injury, Infarction
- Identifying the site of infarction
- Recording an 18 lead ECG
- Lots of Practice Tracings

Learner Objectives

- ◆ Identify a normal 12 Lead ECG
- ◆ Calculate the QRS axis
- ◆ Identify right and left bundle branch block
- ◆ Identify the following infarcts: anterior, lateral, inferior, posterior, right ventricular
- ◆ Describe when and how to obtain an 18 lead ECG

Day 2:

Cardiac Diagnostics and Treatment Update

- Heart Sounds
- Physical Exam Pearls
- Utilizing Data at the Bedside
- Cardiac Imaging
- Evidence Based Practice and State of the Art Treatment for
 - Acute Coronary Syndrome
 - Atrial Fibrillation
 - Heart Failure Treatment
 - Valvular Heart Disease

Learner Objectives

- ◆ Utilize key assessment findings to identify cardiovascular disease.
- ◆ Compare diagnostic information obtained from lab studies, monitoring data, cardiac echocardiogram, and nuclear scanning.
- ◆ Discuss recent changes in treatment strategies for ACS, atrial fibrillation, heart failure, and valvular heart disease.

Day 3:

Emergency and Critical Issues in Cardiac Care

- Obstructive Shock States
- Aortic Dissection
- STEMI Complications
- High Risk Non STE ACS
- Hypertensive Urgency
- Critical Aortic Stenosis
- Acute Bacterial Endocarditis
- Acute Decompensated Heart Failure
- Cardiorenal Syndrome
- Sudden Cardiac Death

Learner Objectives

- ◆ Recognize clinical features for the rapid diagnosis of cardiothoracic emergencies and mechanical complications.
- ◆ Identify the challenges and complexities in high risk Non STE ACS, cardiorenal syndrome, and critical aortic stenosis
- ◆ Describe priority nursing intervention in the emergencies of acute endocarditis, decompensated HF, and sudden cardiac death.
