Comprehensive Cardiovascular Update

Join us on a journey that
makes a difference!

WHO SHOULD ATTEND?

You! You are the hero who holds the keys to healthcare transformation one patient encounter at a time. Your practice produces real impact through compassion and excellence at the point of care.

Karen and Cindy take vast and complex information, synthesize it for you, and present content with relevant and practical applications.

During this 2-day journey you gain confidence, develop expertise, and achieve recognition in your workplace.

*EXCELLENCE - EVERY NURSE,
EVERY DAY, EVERY PATIENT
ENCOUNTER*

KEY CHOICE / CNEA

**CNEA IS AN PROVIDER APPROVED BY THE CALIFORNIA
BOARD OF REGISTERED NURSING PROVIDER NUMBER**

Course Content

Day 1

- ✓ Everything new in heart failure care: SGLT2 inhibitors and more.
- ✓ A potpourri of the most recent recommendations and advances in the management of electrical related disorders.
- ✓ A close up look at the advances in treatment of valvular heart disease and cardiomyopathies.
- ✓ The cardiorenal connection: What you need to know about current recommendations for your patients with heart and kidney disease.

Day 2

- ✓ All things CAD: What's new in diagnosis and treatment, including revascularization.
- ✓ The most current recommendations in risk factor modification: All you need to know to equip your patients to reduce their cardiovascular risk.
- ✓ Current update: Peripheral vascular disease and ischemic stroke.
- ✓ Understanding the impact of COVID 19 on cardiovascular health.

Course Objectives

Day 1

- Discuss new and updated recommendations and their rationales in the newest heart failure guidelines.
- Review current recommendations in the evaluation and treatment of electrical disorders including atrial fibrillation, VT ablation, chronotropic incompetence, syncope and more.
- Evaluate most recent evidence and recommendations in the treatment of select cardiomyopathies, aortic valve stenosis, and mitral valve regurgitation.
- Explore what is new in renal disease and the implications for patients with cardiovascular disease.

Day 2

- Examine the latest updates in the diagnosis and treatment of coronary artery disease including most current recommendations in percutaneous and surgical revascularization.
- Compare current recommendations for risk factor modification of HTN, dyslipidemia, tobacco use, diabetes and sleep apnea.
- Investigate the newest recommendations for the treatment of peripheral arterial disease and ischemic stroke.
- Analyze the cardiac consequences of COVID 19 and implications of current and future practice.
